"Never waste GPU time!!"

Best way to not waste time is to know when your training has finished

PushOver
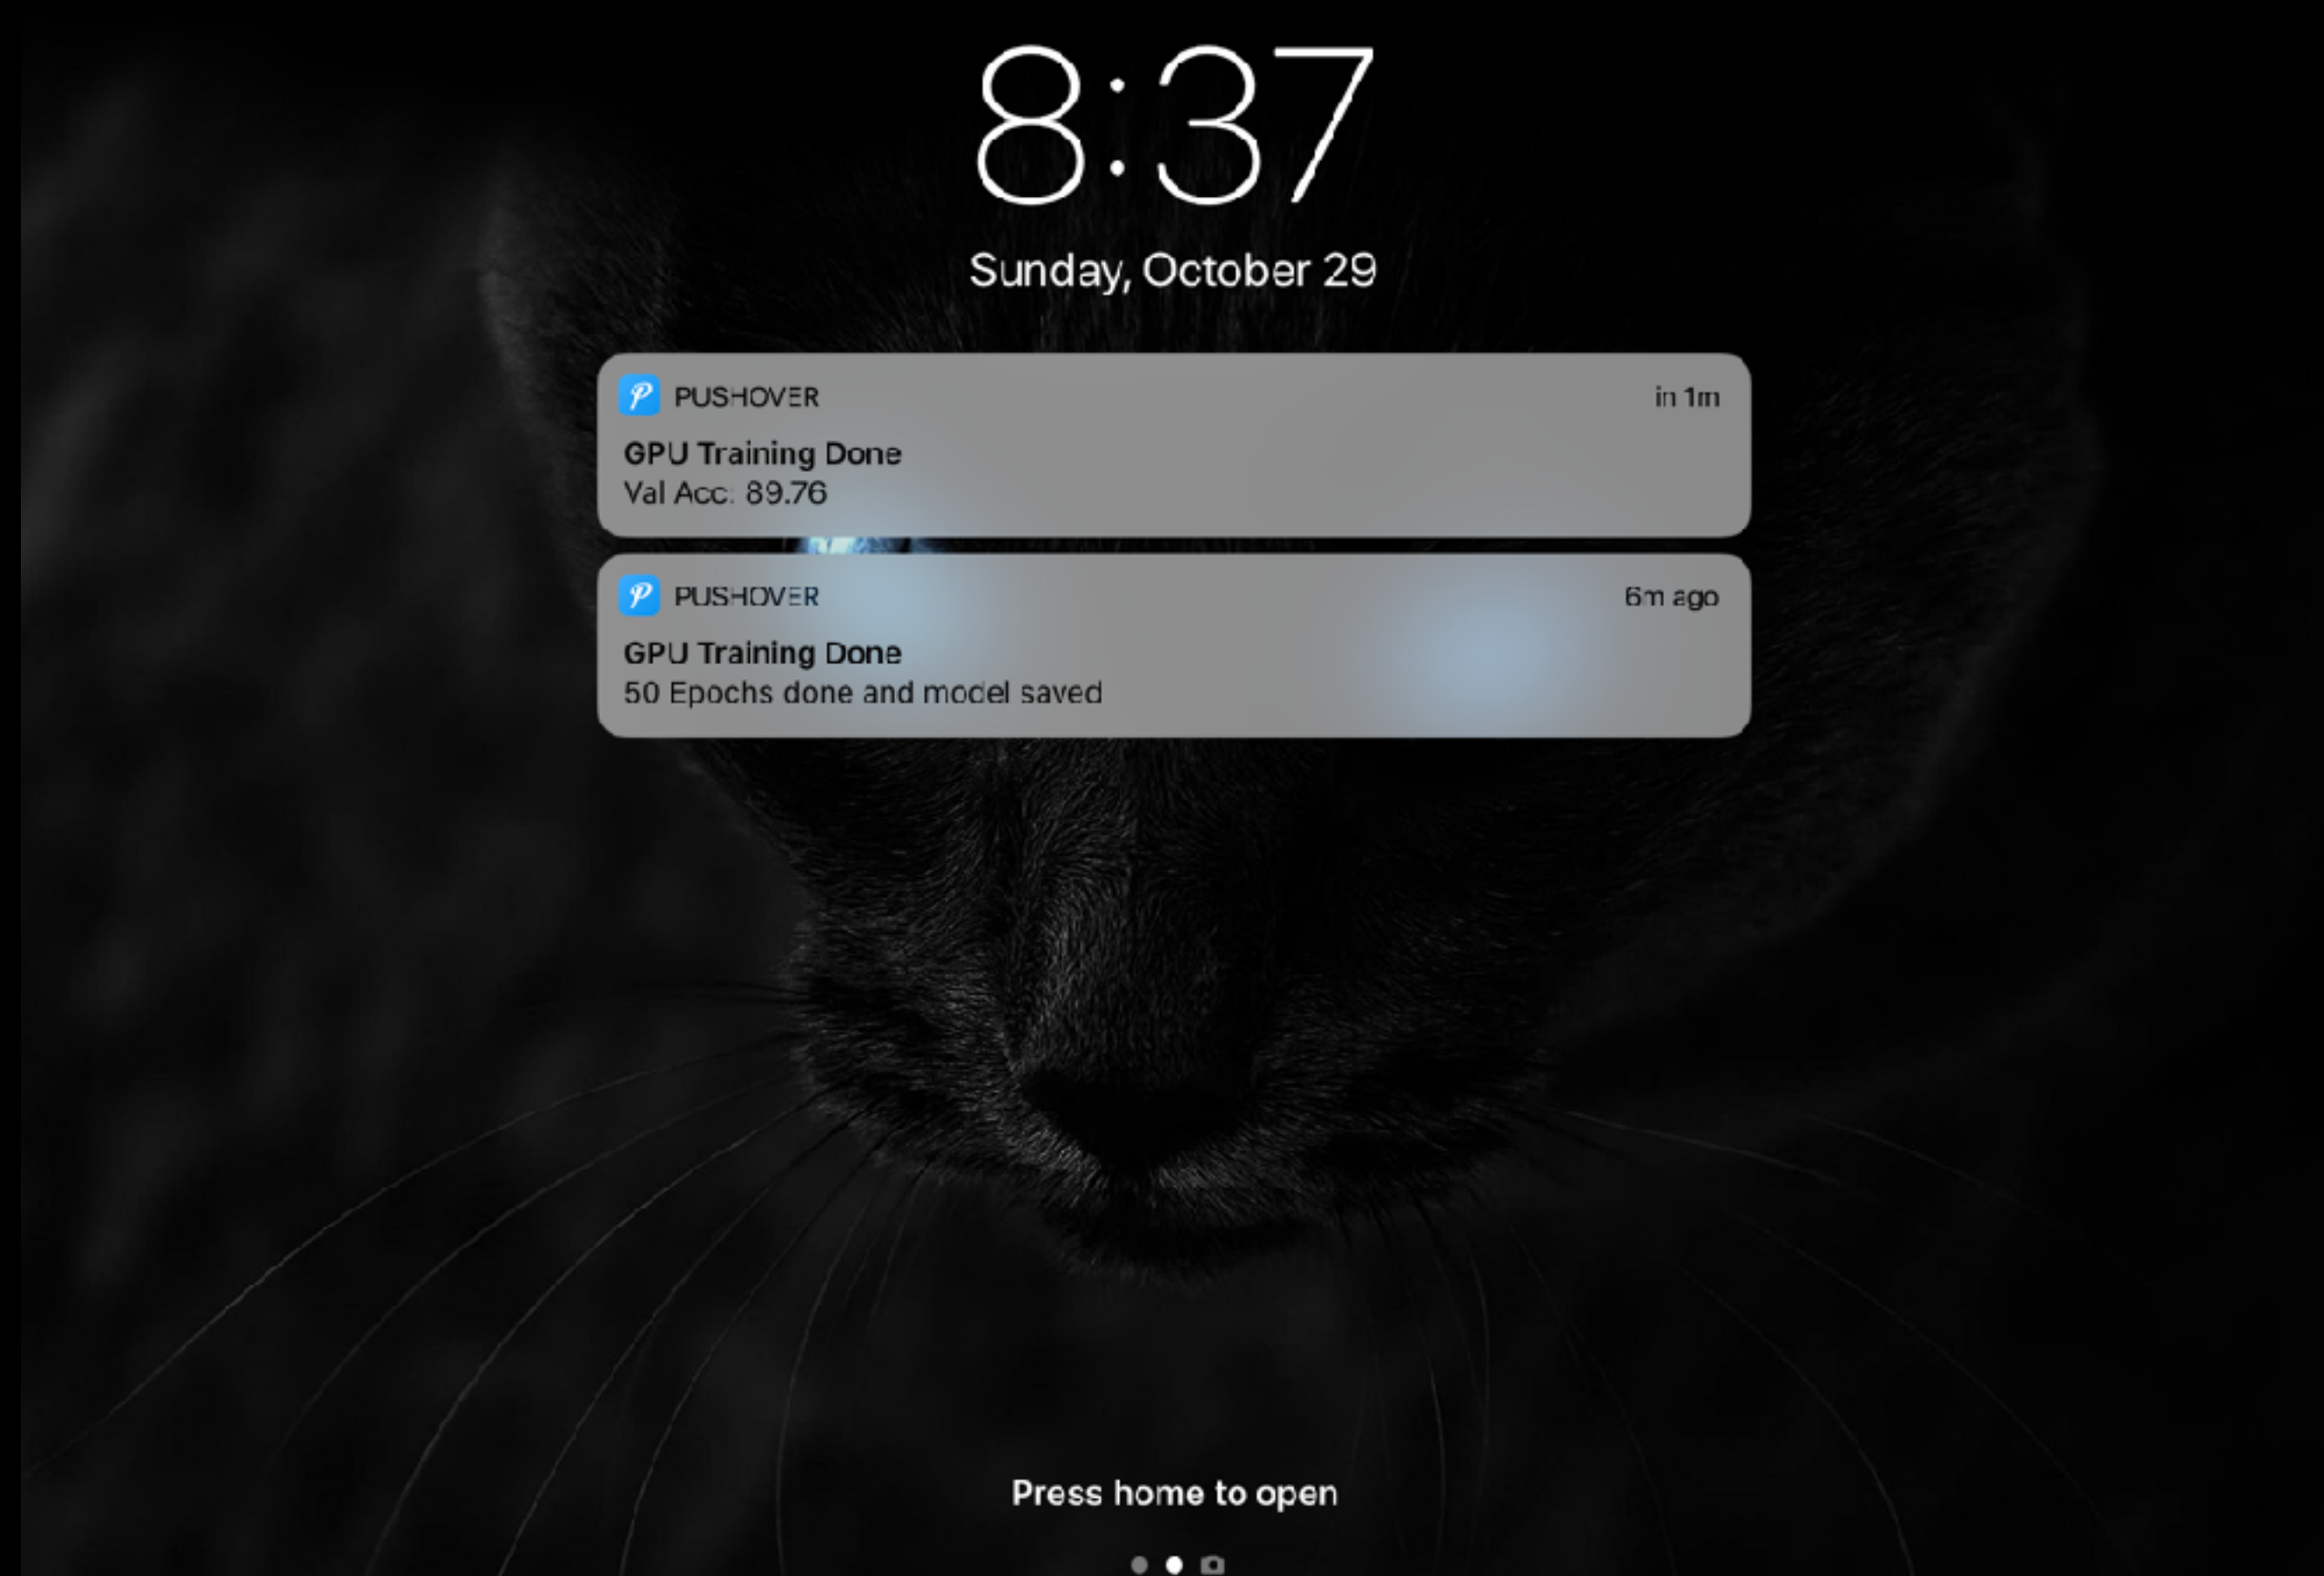

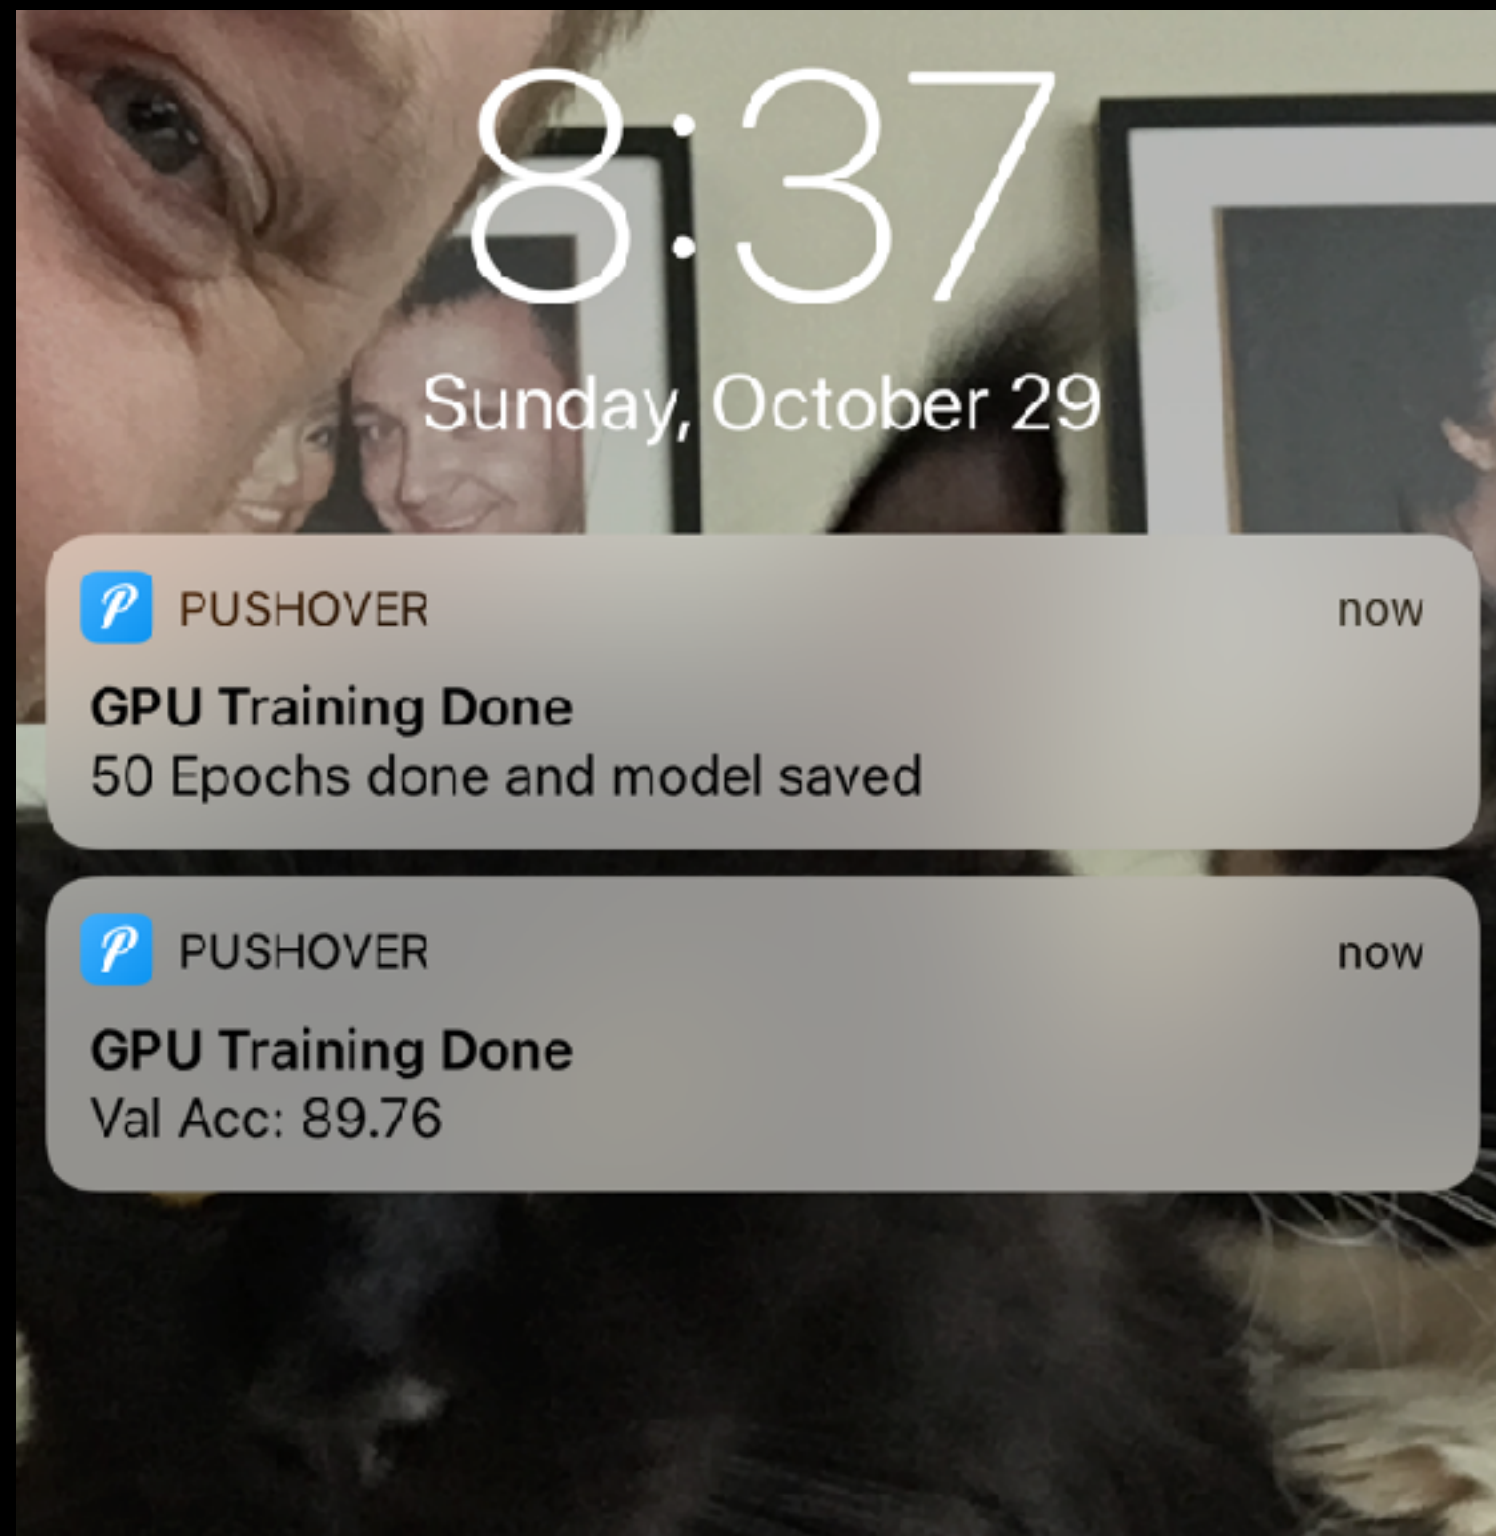

PushOver
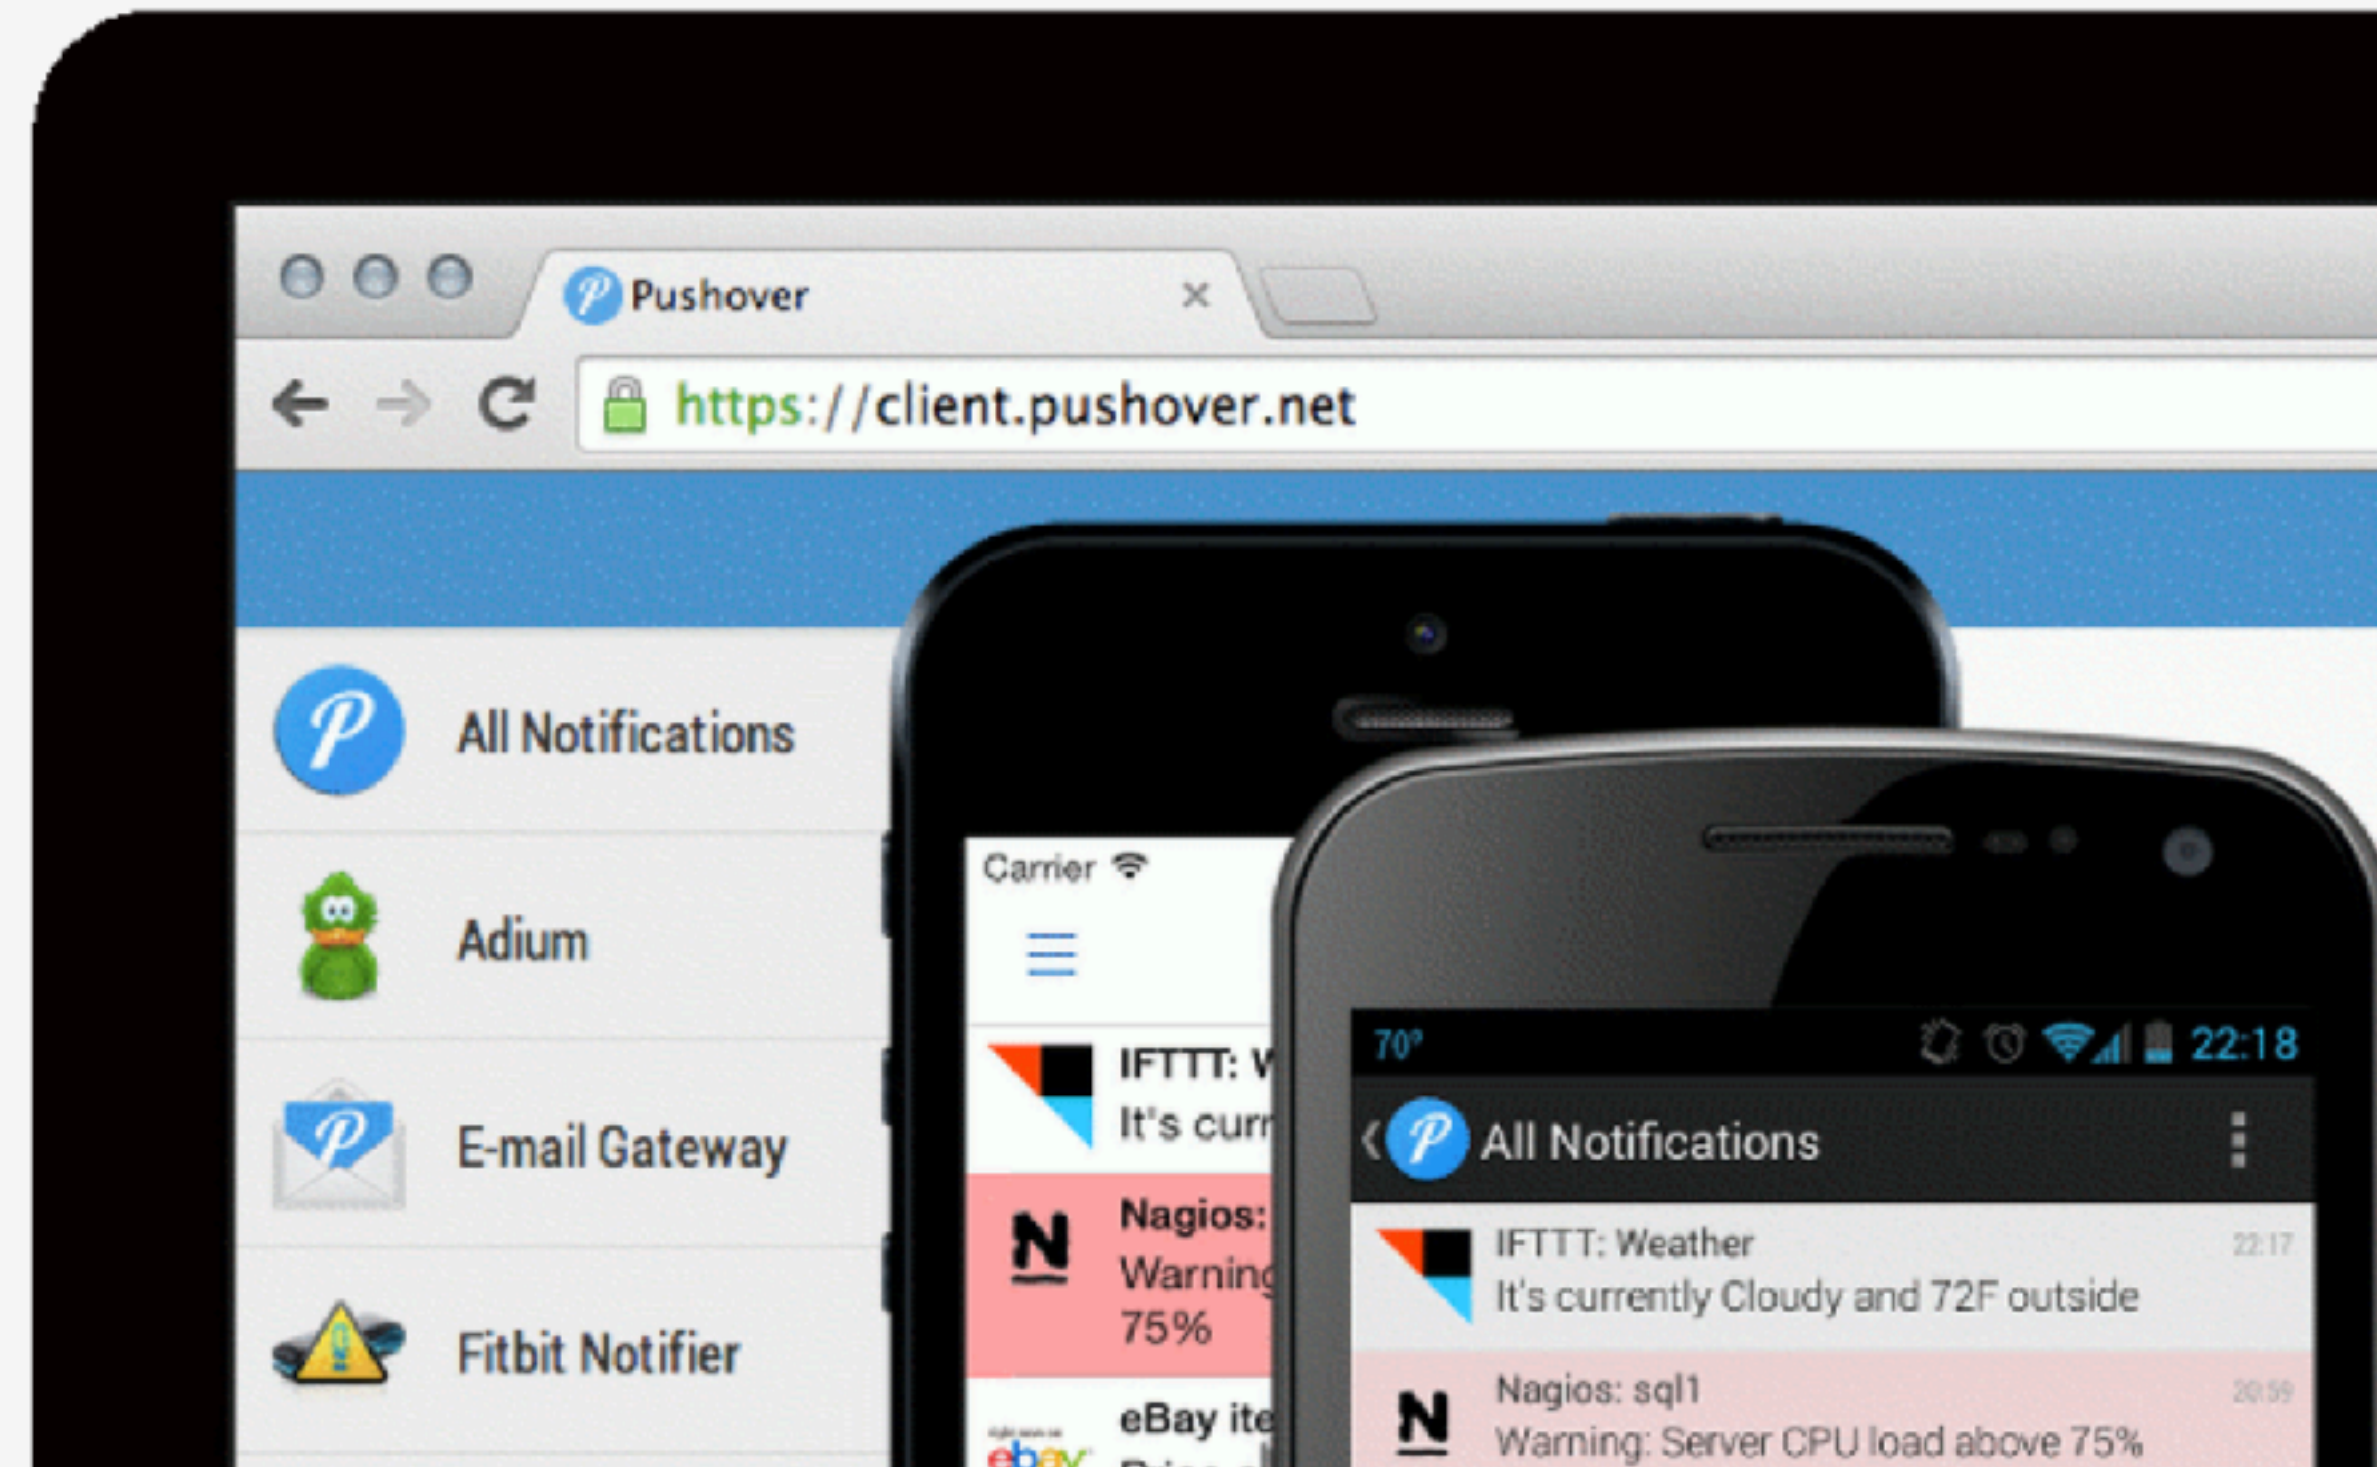

Making a Push

```
In [6]: from pushover import PushOver
```

```
In [16]: user_key = 'insert_key'
         app_token = "app_token"
         alert = PushOver(app_token,user_key)
```

Making a Push

```
In [22]: alert.title = 'GPU Training Done'
         alert.sound = 'climb' #'tugboat'
         alert.msg = '50 Epochs done and model saved'
         alert.show_message()

         Message: 50 Epochs done and model saved
         Title: GPU Training Done
         Sound: climb

In [23]: alert.send()

         sending
```
